THE DENTAL ADVISOR

Nupro White Varnish was evaluated by 36 consultants in 817 uses. It received a 96% clinical rating.

Description

Nupro White Varnish is a 5% sodium fluoride varnish with rapid fluoride release. It is formulated to reduce the amount of time patients must avoid hot beverages, crunchy foods, brushing, etc., by half.

Nupro White Varnish comes in a unit-dose pack that the user can snap onto a prophylaxis grip, place on a flat surface, or grasp in between fingers. It can be applied to wet teeth and sets to a clear coating.

Product features

Nupro White Varnish quickly sets to a clear finish, which is important to patient acceptance. The variety of flavors was appealing to adults and children. The quick fluoride release that allows patients to be free of restrictions in two hours was well received.

Application is smooth, with no clumping or dripping. It can be applied to wet teeth but went on more evenly if the teeth were relatively dry.

The Nupro White Varnish packs are easy to hold and handle.

72% of consultants reported that Nupro White Varnish was better than competitive products, and 28% said it was equivalent. 97% would switch to Nupro White Varnish, and 97% would recommend it.

Consultants' Comments

- ◆ "Patients appreciated the reduced time for restrictions."
- ◆ "Goes on smoothly."
- ◆ "Dries clear."
- ◆ "I would prefer brushes attached to fluoride packet."
- ◆ "Best varnish I have ever used."

UNIPACK STERILIZATION POUCHES

With built-in internal indicator strip

Blue-tinted see-through, self-seal pouches printed with two external color-changing indicators – one for steam (autoclave) process and the other for ethylene oxide (EtO gas) process. Each pouch also includes a built-in internal indicator for steam process, as recommended by the CDC. Perforated easy-seal flap with 3/4" wide adhesive strip. Strong triple seal eliminates shattering and tearing. Produced with lead-free inks.

Transcodent Painless Steel Injection Needles were used by 26 clinical consultants in over 900 procedures. It received a 95% clinical rating.

++++½

Description

Transcodent Painless Steel Injection Needles are single-use, sterile needles for the delivery of anesthetic. Each needle has a three-edge lancet grinding and a siliconized cannula for smooth entry and patient comfort. Each hub has a bevel marking and is threaded to ensure easy and safe handling.

The needles are to be used with imperial thread injection syringes. To use, bend the cap to break the heat seal, and remove the back-cap. Screw the needle on an anesthetic syringe and pull off the front cap. Note the bevel mark for optimal needle point location during injection.

Product features

Overall, clinical consultants found the characteristics of Transcodent Painless Steel Injection Needles superior compared to their current brand of injection needles. Patient comfort and smoothness of the injection were among the highest rated characteristics.

The sharpness of the bevel, in combination with the good stiffness of the siliconized cannula, allows for smooth entry into tissue with improved comfort to patients. No problems were reported with the fit of the needle to the syringe or removal from the syringe.

91% of consultants rated Transcodent Painless Steel Injection Needles equivalent to or better than their current injection needle, 70% indicated they would switch, and 78% would recommend them to their colleagues.

Consultants' Comments

- ◆ "Needle is very sharp and slides smoothly into tissue."
- ◆ "Once screwed on, the threads of the hub lock onto the syringe better than other needles."
- ◆ "Dependable, high quality product!"
- ◆ "Needles seemed less painful to patients."
- ◆ "I like the bevel orientation mark."
- ◆ "Needle seems to be slightly flexible."
- ◆ "I prefer needles packaged in a plastic tub insert or a box that can act as a dispenser."
